The Journal of Gemmology

VOLUME 29
NUMBERS 1–8  2004–2005

CONTENTS

[No. 1, January 2004]
SUNAGAWA, I., JOBINS, E. A., TINNYUNT, E., Coiled ‘rutile’ whiskers in a single quartz crystal ........................................... 1
GRAPES, R. H., HOSKIN, P. W. O., Colour zoning and composition of ruby-sapphire from Westland, New Zealand ............... 8
KRZEMNICKI, M. S., Red and green labradorite feldspar from Congo ................................................................. 15
VASILIEV, A. V., Optimizing faceting for beauty .......................................................... 25
HUANG FENGMING, CHEN ZHONGHUI, TONG HUA, ZHOU YING, ZHANG ZIQI, YANG MINGXING, The microstructure of the shell and cultured blister pearls of Pteria penguin from Sanya, Hainan, China .................................................. 37
Abstracts ........................................................................................................................................................................... 48
Book Reviews ....................................................................................................................................................................... 53
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices .................... 54

[No. 2, April 2004]
SCHMETZER, K., KIEFERT, L., HÄNNI, H. A., Asterism in beryl, aquamarine and emerald—an update ............................................ 65
HENN, U., Aventurescent oligoclase feldspar from Oregon, USA .......................................................................................... 72
HANNI, H. A., KRZEMNICKI, M. S., Pezzottaite, a new mineral and gem ............................................................................ 75
PISUTHA-ARNOND, V., HAGER, T., WATHANAKUL, P., ATICHAT, W., Yellow and brown coloration in beryllium-treated sapphires ............................................................................................................................... 77
NICOL, D., Nephrite jade in Finland ......................................................................................................................................... 105
Letters to the Editor ............................................................................................................................................................ 109
Abstracts .............................................................................................................................................................................. 111
Book Reviews ....................................................................................................................................................................... 115
Tribute ..................................................................................................................................................................................... 117
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices .................... 120

[No. 3, July 2004]
SCHMETZER, K., SCHWARZ, D., The causes of colour in untreated, heat treated and diffusion treated orange and pinkish-orange sapphires—a review .................................................................................................................... 149
Book reviews ........................................................................................................................................................................ 183
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices .................... 185

[No. 4, October 2004]
SCARRATT, K., HANNI, H. A., Pearls from the lion’s paw scallop .......................................................................................... 193
ECEKHOUT, S. G., SABIONI, A. C. S., FERREIRA, A. C. M., A treatment study of Brazilian garnets ................................... 205
MASHKOVTEV, R. I., SMIRNOV, S. Z., The nature of channel constituents in hydrothermal synthetic emerald ................... 215
CARTIER, R. H., A new definition of optic axis for gemmology and the four kinds of optic axis ........................................... 228
Abstracts .............................................................................................................................................................................. 235
Book Reviews ....................................................................................................................................................................... 240
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices .................... 241
BULANOVA, G. P., VARSHAVSKY, A. V., KOTEGOV, V. A., A venture into the interior of natural diamond: genetic information and implications for the gem industry Part I: The main types of internal growth structures ......................................................... 377
BREDDING, C. M., SHIGLEY, J. E., SHEN, A. H., As-grown, green synthetic diamonds ............................................................... 387
TAN, T. L., WONG, D., LEE, P., Iridescent colours of the abalone shell (Haliotis glabra) .............................................................. 395
SCHLUTER, J., LOHMANN, M., METGE, J., REIME, B., Diffraction enhanced imaging: a new X-ray method for detecting internal pearl structures .................................................................................. 401
SCHMETZER, K., SCHWARZ, D., A microscopy-based screening system to identify natural and treated sapphires in the yellow to reddish-orange colour range ...................................................... 407
TESHIMA, K., KONDO, H., OISHI, S., Growth of hexagonal bipyramidal ruby crystals by the evaporation of molybdenum trioxide flux .............................................................................................................. 450
YANG RUZENG, YANG YUAN, XU HONGYI, Sapphire diffusion treatment and the behaviour of iron and titanium ..................... 455
SCHMETZER, K., KIEFERT, L., BERNHARDT, H.-J., BURFORD, M., Two remarkable taffeite crystals from Sri Lanka .................. 461
NICHOL, D., GIESS, H., Nephrite jade from Scortaseo, Switzerland ............................................................................................. 467
HOOVER, D. B., WILLIAMS, B., Crossed filters revisited .............................................................................................................. 473
Letters to the Editor ........................................................................................................................................................................ 482
Abstracts .......................................................................................................................................................................................... 484
Book Reviews .................................................................................................................................................................................. 488
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices ............................... 490

[No. 7/8, July/October 2005]

JOBBINS, E. A., Professor Dr Edward Joseph Gübelin, A tribute .................................................................................................. 257
HAINSCHWANG, T., KATRUSH, A., VOLSTADT, H., HPHT treatment of different classes of type I brown diamonds ..................... 261
COWING, M. D., Describing diamond beauty—assessing the optical performance of a diamond .................................................. 274
SCHMETZER, K., KIEFERT, L., BERNHARDT, H.-J., BURFORD, M., Gem-quality musgravite from Sri Lanka ........................... 281
NICHOL, D., GIESS, H., Note on nephrite jade from Val Faller, Switzerland .................................................................................. 299
NICHOL, D., GIESS, H., Nephrite jade from Mastabia in Val Malenco, Italy .................................................................................. 305
KILLINGBACK, H., Stereoscopic effect in asterism and chatoyancy ................................................................................................. 312
TAN, T. L., TAY, T. S., KHAIRONAN, S. K., LOW, Y. C., Identification of an imitation of pearl by FTIR, EDXRF and SEM .................. 316
HANNI, H. A., KIEFERT, L., GIßE, P., X-ray luminescence, a valuable test in pearl identification .......................................................... 325
SINHUA SONG, RUIHUA WU, WEIZHENG WU, The variation of RI with rotation of a doubly refractive gemstone on the refractometer hemicylinder .............................................................................................................. 331
STURMAN, B. D., Use of the polarizing filter on the refractometer ................................................................................................. 341
Letter to the Editor ........................................................................................................................................................................... 349
Abstracts .......................................................................................................................................................................................... 350
Book Reviews .................................................................................................................................................................................. 357
Proceedings of the Gemmological Association and Gem Testing Laboratory of Great Britain and Notices ............................... 360

[No. 5/6, January/April 2005]

INDEX

Compiled by Carol M. Stockton

Notes on changes from subject indexes prior to 2004:

• Author names are no longer listed alphabetically by name within this index; refer to Table of Contents on the preceding pages for authors.

• Book reviews are now listed alphabetically by book title under the single heading ‘Book reviews’, instead of being individually listed throughout the Index.

• Entries are no longer provided for outside articles covered in the Abstracts section of The Journal; see the heading 'Abstracts' for page numbers where the Abstracts section can be found.

A

Abalone  
shell, iridescent colours (Tan)395–399

Abstracts (section of the Journal)  
48–52; 111–114; 235–240; 350–356; 484–488

Absorption spectra, see Spectroscopy  
[variou]s

Almandine, see Garnet

Almandine-spessartine, see Garnet

Andradite, see Garnet

Annealing, see Diamond treatment

Aquamarine  
asterism in (Schmetzer)65–71

Asterism  
in beryl (Schmetzer)65–71  
letter on ‘Asterism and chatoyancy’ (Killingback)482  
stereoscopic effect in (Killingback)312–315

Aventurescence  
in oligoclase from USA (Henn)72–74

B

Backscattered electron imaging  
of musgravite from Sri Lanka (Schmetzer)281–289  
of ruby and sapphire from New Zealand (Grapes)38–14  
see also Scanning electron microscopy

Beryl  
asterism in (Schmetzer)65–71

Beryllium (Be) diffusion, see Diffusion treatment

Biaxial gemstones  
optic axis of (Cartier)228–234

Book reviews  
Adat + Jaspis by Dröschel (O’Donoghue)357  
Bierstein-Fenster in de Urzelt by Kobbert (O’Donoghue)488  
Burma Ruby: A History of Mogok’s Rubies from Antiquity to the Present by Samuels (O’Donoghue)115–116  
Calcite: The Mineral With the Most Forms by various (O’Donoghue)115  
China by Ottens (O’Donoghue)358  
Crystal Growth and Development Interpreted from a Mineral’s Present Form by Kantor (O’Donoghue)183  
Crystals, Growth, Morphology and Perfection by Sunagawa (O’Donoghue)358–359

Diamond Handbook: How to Look at Diamonds and Avoid Rip-Offs by Newman (O’Donoghue)358  
Diamonds. Revised edn. by Ward (O’Donoghue)53  
Diamonds. The World’s Most Dazzling Exhibition, 8 July 2005 – 26 February 2006 by Jackman (O’Donoghue)488  
Dictionary of Gems and Gemology by Manutecher-Danai (O’Donoghue)489  
Edle Steine vom Dach der Welt by various (O’Donoghue)357–358; 488  
Faszination Turnerblin by Rustemeyer (O’Donoghue)358  
Fleischer’s Glossary of Mineral Species by Mandarino (O’Donoghue)358  
Fluor spar in the North Pennines ed. by Fairbairn (O’Donoghue)115  
Flux-Enhanced Rubies and Sapphires by Themelis (O’Donoghue)116  
Gem and Ornamental Materials of Organic Origin by Campbell Pederson (Jobbins)53  
Gemmology (3rd edn.) by Read (Daly)489  
Geology of Gems by Kievenko (O’Donoghue)183  
Handbook of Mineralogy. Borates, Carbonates, Sulphates by Anthony (O’Donoghue)115  
Laboratory Created Diamonds by Woodring (O’Donoghue)489  
Lapit Korsikett by Vartiainen (O’Donoghue)359  
Magic of Minerals and Rocks by Wiersma (O’Donoghue)359  
Mana Pounamu. New Zealand Jade by Beck (O’Donoghue)357  
Minerals, Their Constitution and Origin by Wenk (O’Donoghue)359  
The National Gem Collection, Smithsonian Institution by Abrams (Howie)488  
Pearl Buying Guide. 4th edn. by Newman (O’Donoghue)115  
Pearling in the Arabian Gulf by Marsoon al-Shamlan (Strack)115

Brazil  
garnet from, treatment of (Eeckhout)205–214

Brilliance  
in diamond, faceted (Cowing)274–280

C

Calcareous concretions, see Pearl, non-nacreous

Cathodoluminescence  
of diamond, internal zoning (Bulanova)377–386  
see also Fluorescence, ultraviolet [UV], Luminescence

Cat’s-eye, see Chatoyancy; specific gem materials

Cause of colour, see Colour, cause of

Ceylon, see Sri Lanka

Chatoyancy  
letter on ‘Asterism and chatoyancy’ (Killingback)482  
stereoscopic effect in (Killingback)312–315

Chemical analysis, see specific methods

Chemical composition (quantitative)  
of garnet from Brazil (Eeckhout)205–214  
of musgravite from Sri Lanka (Schmetzer)281–289  
of nephrite from Italy (Nichol)305–315  
of ruby—  
from New Zealand (Grapes)8–14
from Vietnam (Long)129–147
of sapphire—
blue, diffusion-treated (Yang Ruzeng)455–460
from New Zealand (Grapes) 8–14
from Vietnam (Long)129–147
taaffeite from Sri Lanka
(Schmetzer)290–298; 461–466
see also Backscattered electron imaging; Spectrometry [various]; Spectroscopy [various]; specific gem materials
Clarity enhancement, see specific gem materials
Colour, cause of
in sapphire—
diffusion-treated yellow and brown (Pisutha-Arnond)77–103
untreated vs. treated
(Schmetzer)407–449
untreated, heat-treated, and
diffusion-treated orange and pinkish orange (Schmetzer)
149–182
Colour grading, see Diamond, coloured
Colour zoning
in ruby, from New Zealand (Grapes)
8–14
in sapphire, from New Zealand
(Grapes)8–14
see also Zoning
Concretions, see Pearl, non-nacreous
Congo, Democratic Republic of the [formerly Zaire]
labradorite reportedly from
(Krzemnicki)15–23
Corundum
diffusion treatment of (Pisutha-Arnond)77–103
from Vietnam (Long)129–147
see also Ruby; Sapphire
Corundum, synthetic, see Ruby, synthetic
Crossed filters technique, see Filters
Crystallography
and optic axis (Cartier)228–234
of pezzottaite (Hänni)75–76
Cultured pearl, see Pearl, cultured
Cuts and cutting of, see Diamond, cuts and cutting of; Faceting
D
Democratic Republic of the Congo, see Congo, Democratic Republic of the [formerly Zaire]
Diamond
grading, description of optical performance (Cowing)274–280
internal growth structure (Bulanova)377–386
see also Diamond, coloured; Diamond, cuts and cutting of; Diamond, synthetic; Diamond treatment
Diamond, coloured
brown, classification of
(Hainschwang)261–273
see also Diamond, synthetic
Diamond, cuts and cutting of
‘Computational Science’ in analysis
of (Nassau)349
internal growth structure (Bulanova)377–386
optical performance and description
(Cowing)274–280
see also Faceting
Diamond, synthetic
green (Breeding)387–394
Diamond treatment
HPHT of type I brown
(Hainschwang)261–273
Diffusion treatment
of corundum (Pisutha-Arnond)
77–103
see also Treatment
E
EDXR [energy-dispersive X-ray fluorescence], see Spectroscopy, energy-dispersive X-ray
Electron microprobe analysis
of emerald, synthetic, hydrothermal
(Mashkovtsev)215–227
of garnet from Brazil (Eckhout)
205–214
of musgravite from Sri Lanka
(Schmetzer)281–289
of ruby—
from New Zealand (Grapes)
8–14
from Vietnam (Long)129–147
of sapphire—
diffusion-treated blue (Yang Ruzeng)455–460
from New Zealand (Grapes)
8–14
from Vietnam (Long)129–147
taaffeite from Sri Lanka
(Schmetzer)290–298, 461–466
see also Chemical composition
Elemental mapping, see Backscattered electron imaging
Emerald
asterism in (Schmetzer)65–71
see also Beryl
Emerald, synthetic
hydrothermal, channel constituents in
(Mashkovtsev)215–227
Energy-dispersive X-ray spectroscopy [EDX], see Spectroscopy, energy-dispersive X-ray
Enhancement, see Diamond treatment; Diffusion treatment; Treatment; specific gem materials
EPMA, see Electron microprobe analysis
Errata
to 2003/28:505—name of Nikolas Kiely-Lambrinides in obituary
corrected 60
to 2003/28:479–81—figures not in colour in ‘Chemical fingerprinting of some East African gem rubies...’
60
to 2005/29:318—wavelength in Table I in ‘Identification of an imitation of pearl by FTIR, EDXR and SEM’ 500
F
Faceting
optimizing for beauty
(Vasilev)25–36, 109–110; (Rome) 109; (Fürbach)110
see also Diamond, cuts and cutting of
Farn, Alexander E.
obituary 60; (Scarratt)117–119
Feldspar
labradorite, reportedly from Congo
(Krzemnicki)15–23
oligoclase, aventurescent, from USA
(Henn)72–74
Filters
glass, crossed, types and use of
(Howard)473–481
polarizing, use with reflectometer
(Sturman)341–349; (Cartier)482;
Response (Sturman)483
Finland
nephrite jade from (Nichol)105–108
Fluorescence, ultraviolet [UV]
crossed filters technique
(Howard)473–481
of pearl, imitation (Tan)316–324
see also specific gem materials
Fluorescence, X-ray, see Spectroscopy, energy-dispersive X-ray fluorescence [EDXR]
Fourier-transform infrared spectrometer [FTIR], see Spectroscopy, infrared
French, Anthony
obituary (O’Donoghue)188
G
Garnet
from Brazil (Eckhout)205–214
treatment of (Eckhout)205–214
Gem localities, see specific countries; specific gem materials
Geographical origin, see specific countries; specific gem materials
Glass, see Filters
Grading, see Diamond, cuts and cutting of
Grossular [grossularite]
from Brazil, treatment of (Eckhout)205–214
Grossular-andradite, see Garnet
Growth structure, see Crystallography
Gübelin, Edward Joseph
in honour of (Koivula)259
obituary 372; (Jobbins)257–259
H
Heat treatment, see Diffusion treatment; Treatment; specific gem materials
Hessionite, see Grossular
High-pressure, high-temperature [HPHT] growth, see Diamond, synthetic
HPHT [high pressure, high temperature], see Diamond, synthetic; Diamond treatment
Huang Fengming
obituary (Li Liping)372
yellow and brown (Pisutha-Arnond)77–103
yellow to reddish orange
(Schmetzer)407–449
identification, untreated vs. treated
(Schmetzer)407–449
from New Zealand (Grapes)8–14
from Vietnam (Long)129–147
see also Corundum
Sapphire, inclusions in
diffusion-treated (Schmetzer)407–449
see also Inclusions
Scanning electron microscopy
[SEM] (imaging only; for chemical composition determination using SEM, see Spectroscopy, energy-dispersive X-ray)
of pearl—
cultured blister from China
(Huang Fengming)37–47
imitation (Tan)316–324
non-nacreous, from lion’s paw scallop (Scarratt)193–203
of shell—
lion’s paw scallop (Scarratt)193–203
*Pteria penguin*, from China
(Huang Fengming)37–47
Scintillation
in diamond, faceted (Cowing)
274–280
SEM, see Scanning electron microscopy
Shell
lion’s paw scallop and pearls from
(Scarratt)193–203
*Pteria penguin* and cultured blister
pearls from China (Huang Fengming)
37–47
see also Abalone
Simulants, see specific gem materials simulated
Spectroscopy, laser ablation–inductively coupled plasma–mass [LA-ICP-MS] and –atomic emission [LA-ICP-AES]
of sapphire, diffusion-treated yellow and brown (Pisutha-Arnond)77–103
of shell, lion’s paw scallop (Scarratt)193–203
Spectroscopy, energy-dispersive X-ray [SEM-EDX and EDXRF]
of labradorite, reportedly from
Congo (Krzemnicki)15–23
of pear, imitation (Tan)316–324
of ruby and sapphire from Vietnam
(Long)129–147
see also specific gem materials
Spectroscopy, infrared
of diamond, brown, before and after HPHT treatment
(Hainschwang)261–273
of diamond, synthetic green
(Breeding)387–394
of emerald, synthetic (Musgravit)281–289
of jadeite (Hoover)473–481
of sapphire—
diffusion-treated yellow and brown
(Pisutha-Arnond)77–103
untreated vs. treated
(Schmetzer)407–449
(Schmetzer)149–182
of shell, lion’s paw scallop (Scarratt)193–203
see also specific gem materials
Spectroscopy, X-ray fluorescence, see Spectroscopy, energy-dispersive X-ray [SEM-EDX and EDXRF]
Spessartine [spessartite]
from Brazil, treatment of (Eeckhout)
205–214
Sri Lanka
musgravite from (Schmetzer)281–289
taaffeite from (Schmetzer)290–298,
461–466
Star, see Asterism; specific gem materials
‘Swiss jade’
nephrite-calcrete rock (Nichol)
299–304, 467–472
Synthetics, see Diamond, synthetic; specific gem materials
T
Taaffeite
from Sri Lanka (Schmetzer)290–298,
461–466
Thermal enhancement, see Heat treatment
Treatment
of garnet from Brazil (Eeckhout)
205–214
HPHT, of diamond (Hainschwang)
261–273
see also Diamond treatment;
Diffusion treatment; specific gem materials
U
Ugrandite, see Garnet
Ultraviolet fluorescence, see Fluorescence, ultraviolet [UV]
Ultraviolet-visible-near-infrared spectroscopy, see Spectroscopy, UV-Vis-NIR
United States of America
feldspar, aventurescent oligoclase
from Oregon (Henn)72–74
V
Vietnam
corundum deposits in (Long)129–147
X
X-ray diffraction analysis
diffraction enhanced imaging
method (Schlüter)401–406
of pearl structure (Schlüter)401–406
see also specific gem materials
X-ray fluorescence [luminescence], see Luminescence
X-ray fluorescence spectroscopy [EDXRF], see Spectroscopy, energy-dispersive X-ray fluorescence
XRF, see Spectroscopy, energy-dispersive X-ray fluorescence
Z
Zoning
in sapphire, untreated vs. treated
(Schmetzer)407–449
see also Colour zoning;
Crystallography; specific gem materials
